

How will I receive my retirement savings if my application to withdraw my retirement savings using my pension/annuity is approved?

If your application to withdraw your retirement savings using your pension/annuity is approved, your retirement savings will be paid to your bank account provided under your Account settings. To better protect you from scams, we will only accept bank accounts from banks that offer automated verification. This ensures payments are made only to your bank account. Currently, only POSB, DBS, OCBC and UOB have such an arrangement with us. We'd be happy to work with other banks to set up similar arrangements.
